US Department of Energy:

Obviously Yucca Mountain is not a safe place to store our nuclear waste. The presence of a fresh water aquifer and seismic activity on a fault line demonstrate that. I implore you not to act hastily in this extremely important decision.

While you are carefully and laboriously making this decision, I suggest we stop producing more of this dangerous waste. This, too, is an obvious solution. Logically and morally it does not make sense to continue producing waste we cannot dispose of.

Please consider future generations when making this decision. Please notate this letter as part of the public comment period.

Thank you for your time,

  
Adrienne Mansanares
